Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant and Examiner discussed possible RCE and the inclusion of language which would establish Applicant's invention in the claims as an a priori measure of motion estimation. Specifically by providing language to define the nature of the motion estimation as being before a resampling or processing ever occurs. Examiner agrees that an establishment of this fact will distance the invention from Thevenaz et al, and will require further consideration and search to establish patentability upon receipt of such an amendment.
